

PONDUS - Approved by ABSOLUTE

The winter wheat variety Pondus has, in November 2021, been approved as starch wheat for distillation, by The Absolut Company in Sweden. It is the third winterwheat variety from Nordic Seed breeding program, to get this approval. Pondus is represented in Sweden by Nordic Seed Sweden. Nordic Seed Sweden is a procurement collaboration between of Swedish Agro, KLF, Vallberga, Hjalmar Møller and Nordic Seed.

Thanks to our group in Sweden, Pondus is now approved for distilling. Pondus has been tested in the official Swedish trials in 2020 and 2021 and it is among the highest performing winter wheat varieties on the Swedish market. In addition to its high yield, Pondus also has a strong health profile and resistance to Orange wheat blossom midge.
